

Lone Star Marina

Are You Ready For Winter?

- Add Fuel Stabilizer
- Visual inspection of the boat so we can get a base line of the condition the boat is in at the time of Winterization, so when we come back in the Spring we will be aware of the condition of your boat.
- If all possible run the boat to bring up Operating Temperature and fill cooling system with non-toxic, biodegradable Antifreeze.
- Check Gauges/Charging Systems and disconnect battery.
- Finishing up with Fogging Oil- This helps coat the internal components of the engine and will prevent Corrosion during winter storage.

Winterization

Boats \$189

PWC's \$99

Outboards \$99

One time trip charge to your dock: Add \$70

It's that time of year again folks and we're offering Winterization Services just for you! Winter has it's way of sneaking up on us and putting off winterizing your boat could have expensive consequences, such as cracked engine blocks and frozen plumbing. So call us now to get on our schedule before it's too late.
